

Please find attached a recent report from the Wilderness Society focussed on tree (land) clearing that we would like to submit as part of your Special Review.

Page 7 in the review references land clearing, however we believe the figures the Authority is relying on (the Federal Government's) are incorrect and in fact tree clearing regulations have been rapidly weakened in recent years, leading to a steep rise in associated emissions.

(Please note: there is reference in this submission to a report by CO2 Australia - this is not yet publicly released but will be at the end of this month. We will be happy to provide the Authority with this report at this time).

Regards,
